High performance  
with a wide range of  
solutions and options.

### Product description

Automatic, touch-free depositing of the VSP F ensures maximum hygiene. The depositing system which is entirely made of stainless steel can be dismantled in just a few steps for easy and thorough cleaning. Create an appealing presentation of your sliced product with numerous depositing patterns to choose from. In addition to fully automatic operation, the system also allows semi-automatic or servo-assisted - and thus simplified - manual operation. The VSP F is perfectly suitable for preslicing products for your fresh food counter. Innovative SmarterSlicing functions ensure perfect slicing results every time, as an early warning system will notify you by means of indicators when the VSP F is due for cleaning, sharpening or maintenance. As a result, you also benefit from optimized system availability and a long service life. Fitted with the FoodConnect interface and RetailControl management software, the SmarterSlicing functions can be controlled centrally and data logged - a perfect basis for process optimizations.

### Highlights

- Perfect, hygienic portions and stacks also directly onto paper or foil
- High slicing performance at minimal energy consumption due to Emotion® technology
- Innovative blade cover: Intelligent quick-lock system for easy assembly
- Illumination: Optional visual display showing the current device mode
- Manual, semiautomatic and fully automatic operation in one machine
- Integrated comfort package such as servo-supported manual slicing
- SmarterSlicing functions:
  - Cleaning, sharpening and maintenance icon
  - Transparent monitoring and central data management
- Slice thickness fine adjustment between 0-3 mm and indication in the display

### Options

- Version with integrated portion scale and slice counter
  - With automatic stop function when the target weight/intended number of slices is reached
  - Easy to configure 7" or 10" touch screen
  - Optimized operating procedure reduces walking distances
- Extended carriage
- Installation via installation bars, feet or lifting device
- Exclusive Ceraclean® surface finish
- Carriage and remnant holder variants
- Various blade options (channeled, Ceraclean®, stainless steel) and safe blade removers
- Wireless connectivity via WLAN
