High performance with a wide range of solutions and options.

PaymentManager - ElectronicCash

Easy connection of payment systems: Integrate payment systems in your selling process and process payment transactions in an easy and transparent manner via the RetailApp PaymentManager.

Product description

The RetailApp PaymentManager connects various payment systems to Bizerba PC scales. ElectronicCash integrates EC terminals in the payment process of the PC scale software RetailPowerScale. Easy management and additional functions for day-end closing are conveniently carried out and configured via the interface of the scale. During the payment process, the current transaction status is directly shown on the scale's operator side. Easy payment with PaymentManager.

Functionality

– Connection of payment terminals to PC scales
– Status messages directly on the scale
– Easy operation due to direct integration in the RetailPowerScale payment process
– Management and additional functions menu for day-end closing and further functions (depending on terminal)

Benefit

– Expansion of payment options in the market
– Immediate connection of already released payment terminals possible
– Complete payment processing directly on the scale
– Individual setting options: Functions such as cash back (increase amount, receive cash back) can be simply activated if supported by the terminal.
